

Dreamweaver CS3 – Level II

8 Hours

Objectives

Your Website is looking good, but it's time to give it a WOW factor. *Dreamweaver CS3 - Level II* will help you get it there. No programming experience is needed. This seminar helps you maximize the full potential of Dreamweaver's capabilities, including use of templates, forms, rollovers, animation, and database-driven pages.

Topics include:

- Working in Code View
- Formatting with Style Sheets
- Creating rollovers, navigation bars, and Flash buttons
- Working with Spry User Interface Widgets
- Working with AP elements
- Using Library Items
- Creating Forms
- Authoring with XML-based Data

Outline

- Work in Code View using the coding features of Dreamweaver
- Format content using style sheets
- Create an effective user-navigation interface
- Work with AP elements to enhance the layout and positioning of elements on a web page
- Automate tasks
- Create forms
- Author a web page using XML-based data
